

## Overview

### See it from all angles

Your customers demand seeing realistic representation of their product before placing an order. Maybe it is to ensure an logo is correctly aligned, or that a new colour-way is available. Well, now they can, with our state-of-the-art MegaEdit 3D module. Whether its an item of clothing, a gift box or a bottle label, the user can see the finished item from all angles!

Besides adding the 'wow' factor to your website, customers can view and edit their product within the preview stages of placing an order, allowing them to easily tweak their final design on the fly.

The detailed 3D preview will also display any special finishes such as embossing, spot varnish or foiling amongst others, so your customer can clearly see the product's full impact and quality on screen before purchase!

**MegaEdit is a powerful online editor that has endless product applications, with an impressive 3D preview feature that our customers love."**

Jesse Brooks, Web Development Manager - Peczuh Printing

## Benefits

If you're in the market for a new web-to-print solution, does the software you're looking at allow for 3D previews, giving customers a comprehensive preview from all angles of what the finished product will look like?

The Infigo platform offers the complete web-to-print solution, that allows users to create fully customised e-commerce storefronts, with a powerful online editor and state-of-the-art 3D preview, which will efficiently process all orders through integrated and automated workflows.

### Find out how our 3D preview feature can help your organisation:

- Add the 'wow' factor and increase sales
- Allow customers to see precisely how their item will look before ordering
- Avoid any nasty surprises on the finished product
- Provide detailed preview displays, which include embossing, spot varnish, foiling and more
